Art Unit: 2826

Serial Number: 09/244163 Attorney's Docket #: 35.C13307

Filing Date: 2/4/99;

Applicant: Shiotsuka et al.

Examiner: Alexander Williams

Applicant's Amendment in Paper # 16, filed 9/18/01 has been acknowledged.

This application contains claims 9-24, 33-48 and 57-64 drawn to an invention non-elected without traverse in Paper No. 6. A complete response to the final rejection must include cancellation of non-elected claims or other appropriate action (see 37 CFR § 1.144 & MPEP § 821.01).

Claims 4-8, 28-32, 49,50, 52-54 and 56 have been canceled.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3, 25-27, 51, 55 and 60-72 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Mori et al. (U.S. Patent # 6,075,202).

Art Unit: 2826

For example, Mori et al. (figures 13C) specifically figures 1 and 7 discloses a solar cell module 1 comprising a substrate, a filler 3, a photovoltaic element 2 which is detachable from the substrate (the support structure of 5,7,8), and a protective layer 4, but fail to explicitly show the exfoliative layer, wherein the exfoliative layer comprises a degradable resin. However, Mori et al. does disclose a thermoplastic resin (see column 4, lines 10-21 and column 9, line 45-60) comprising a degradable resin in which can be used for the exfoliative layer have the same for the purpose of lowering electrical performance of the photovoltaic devices.

Therefore, it would have been obvious to one of ordinary skill in the art to use the teaching of Mori et al.'s thermoplastic resin as the exfoliative layer for the purpose of lowering electrical performance of the photovoltaic devices.
